EDUCATION

Pamantasan ng Lungsod ng Maynila, B.S. in Computer Engineering

Sep 2022 - Expected Aug 2026

GWA: 1.68 / 1.0, Dean's List (All Semesters)

Latin Honor: Cum Laude

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Software Design, Operating Systems

Leadership & Activities: AWS Student Community, Hackathons

TECHNICAL SKILLS

Programming Languages: Python • TypeScript • JavaScript • Java • SQL • C++

Backend: Node.js • Express.js • FastAPI • Flask • REST APIs • WebSockets

Frontend: React • Next.js • Tailwind CSS • Redux Toolkit

Databases: PostgreSQL • MongoDB • Redis

DevOps: Docker • Jenkins • GitHub Actions • CI/CD • Linux

EXPERIENCE

SP Madrid and Associates Law Firm

Manila, PH

Backend Developer Intern | Python, Node.js, Express.js, PostgreSQL, Docker, Jenkins, Git

2026

- Architected route optimization and intelligent task assignment backend using VROOM, OSRM, and H3, reducing field personnel travel time across nationwide operations.
- Developed REST APIs supporting 10,000+ daily operational transactions and business logic using Node.js and Express.js.
- Delivered secure authentication and authorization systems using JWT with RBAC/ABAC policies.
- Containerized services using Docker and supported CI/CD deployment workflows.
- Optimized SQL queries, indexing strategies, caching, and backend performance for operational systems.

PROJECTS

SafeDrive — AI-Powered Driver Monitoring System | Python, Arduino IDE, OpenCV, React.js, CSS *2025-2026*

- Built real-time driver drowsiness detection system using OpenCV and Raspberry Pi, achieving 98% accuracy and alert generation within <200ms latency.
- Designed a multithreaded real-time inference pipeline for driver drowsiness detection with automated alert generation.
- Built web-based dashboards for monitoring driver status and alerts using React.js and Tailwind CSS.

Indigenous Tactical Communication System - AFP Ideathon Finalist | Node.js, Express.js, C++, LoRa, AES-256 *2025*

- Developed a secure long-range communication platform using ESP32 and LoRa technology.
- Implemented AES-256 encryption for secure military field communications for the Armed Forces of the Philippines.
- Built monitoring interfaces using React and Tailwind CSS.

CloudCue — Cloud-Based Workspace | Next.js, Node.js, Express.js, Prisma, PostgreSQL, Socket.io, Docker *2024*

- Developed a collaborative workspace platform using Next.js, Node.js, PostgreSQL, Redis, and Docker.
- Implemented RBAC/ABAC authorization, audit logging, and background job processing.
- Built scalable backend APIs and responsive frontend dashboards.
